

STRUB Clean BIO 3000

Gentle to skin hand cleansing paste with corn husk granules

Art.-No. 30949

Description

STRUB Clean BIO 3000 is a beige, according to the latest findings of ecology and economy, skin-friendly and hygienic hand cleaner with a refreshing lemon scent.

STRUB Clean BIO 3000 hardly causes any skin surface damage due to the use of fine-grained corn husk granules (obtained from the corn spindles) in contrast to sand/quartz sand, wood rasp, polyurethane rubbing bodies and others.

In combination with a dirt solvent (based on neutral, washing-active substances) and the more skin-friendly corn husk granules (free of angular friction bodies), a balanced cleaning result is achieved for the skin.

Application

Before washing with water, rub contaminated hands thoroughly with STRUB Clean BIO 3000. If necessary, use a brush suitable for hands. If possible, rinse off loosened dirt particles under lukewarm running water. Repeat the washing process depending on the degree of soiling. If no water is available, wipe hands with a cloth or tissue. Rinse hands later with normal soapy water.

Features and advantages

- STRUB Clean BIO 3000 is a sand-free, highly concentrated hand washing paste that reduces blockages in drains (dissolves in water itself and decomposes into biomass).
- STRUB Clean BIO 3000 works efficiently and without great cleaning effort on oils, greases and other stubborn dirt.
- STRUB Clean BIO 3000 has a skin-friendly pH value of 6-7, which preserves the natural acid mantle of the skin and at the same time relieves wastewater systems as well as the wastewater pre-treatment (neutralization) of sewage treatment plants and industrial wastewater treatment plants.
- STRUB Clean BIO 3000 behaves as neutrally as possible and is found to be very skin-friendly and refreshing in most cases.
- STRUB Clean BIO 3000 is alkali and mineral oil free and contains no solvents.
- STRUB Clean BIO 3000 is readily biodegradable according to the globally recognized OECD 301B test (CO₂ Evolution Test).
